DETAILED ACTION

Preliminary amendment filed 5 November 2001, which cancels claims 23-28, 30-31 and 33 and add claims 37-38 has been entered. The following Office action is applicable to the pending claims 1-22, 29, 32 and 34-38.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8, 20-22, 29 and 32, drawn to an anti-fibrillogenic agent (peptide) and a composition comprising said peptide agent.

Group II, claims 9-17, drawn to a chimeric molecule, i.e., a conjugate comprising (i) an amyloid plaque-treating moiety, (ii) a peptide linker, and (iii) a peptidic label, which comprises the peptide agent set forth in Group I.

Group III, claims 18-19, drawn to a method of treating amyloidosis disorders in a patient comprising administering to said patient the peptide agent of Group I.

Group IV, claims 34-36, drawn to a method of preparing cells suitable for transplantation into a mammal comprising contacting the cells in vitro with the peptide agent of Group I.

The inventions listed as Groups I–IV do not related to a single general invention concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The instant claim 1 is obvious over Nordstedt, C. et al. (WO 9721728, *June 17, 1997*). Prior to the effective filing date of the instant application, Nordstedt *et al.* teach an peptide composition (interfering with polymerization of A β into amyloid fibrils, i.e.,

Art Unit: 1653

inhibiting amyloidosis) comprising the sequence “KLVFF” (SEQ ID NO:11) (see Example 1, pages 9-12 and 16, which reads on the peptide formula I of the instant claim 1. Thus, the claimed composition does not constitute a special technical feature linking all claims, as defined by PCT Rule 13.2 and 37 CFR 1.475(a), as a single contribution over the art, and a holding of lack of unity is therefore proper.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See “Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b),” 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Applicants are advised that reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
